What is Broadband, Fast and Superfast, and Unlimited data?

- Broadband uses a combination of the latest technologies for high speed internet. The choice of technology and of network service provider is at our discretion.
- Fast Broadband is up to 25/5 Mbps and Superfast Broadband is up to 100/40Mbps, download and upload speeds respectively.
- We cannot promise actual speeds, because things happen in networks (they get congested like roads, and poor cabling can act like speed bumps), but our techies will give you the fastest speed we can.
- “Unlimited” means you can download as much as you like at no extra charge. Upload too, for that matter. Go for it.

Inclusions

- Connecting your residence to the network is included.
- A WiFi Home Gateway is included, and we set it up.
